

## Connecting enterprise mobility with success

With the ever increasing demands on your business from customers, suppliers and investors, business decisions need to be made quickly and accurately to keep you ahead of your competition.

### Work with Jade to realise the true benefits of an enterprise mobility solution.

The convergence of voice and the capture, manipulation, and movement of data will allow your businesses to become more productive, maximise the efficiency of your workforce and help you make improved business decisions based on the increased accuracy of centralised data.

From consulting, design, implementation and support to a fully managed service, Jade has a 15 year history of delivering proven scalable and flexible solutions to companies across a range of industries.

Jade's capabilities, experience and leadership in all vertical industries produces a wealth of proven solutions to help organisations

- Increase operational efficiencies
- Reduce costs
- Improve supply chain visibility
- Manage mobility application requirements across their entire operation

## Dynamic, Flexible, Innovative.

Three reasons why Jade has grown to become one of the UK's leading mobility solution providers.

Jade is one of the UK's leading providers of mobile enterprise solutions within voice and data communications technologies.

Jade is an expert in the areas of:

- Barcoding
- Data Capture
- Fixed Mobile Convergence
- Printing & Media
- RF Networking
- Voice over Wireless LAN (VoWLAN)
- Structured Cabling

## Enterprise Mobility

Employing enterprise mobility within your workplace can help you improve productivity and flexibility, whilst reducing costs.

Whether you are looking to mobilise your workforce with a mobile computer, capture data with a barcode scanner, design and install a robust wireless infrastructure or implement a Voice over WLAN solution (VoWLAN) allowing you to leverage your wireless network to make and receive calls vastly reducing communications costs, Jade has the expertise.

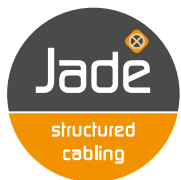

## Mobile Application Development

Having the right mobile application development team behind you is vital if you intend to successfully integrate a bespoke application into your existing business processes. Jade's mobile application development team has developed applications on multiple platforms in a variety of environments that cut costs, boost productivity, and generate new revenues.

## Printing & Media

Jade has designed and delivered the broadest range of industrial printing technologies and solutions for global enterprise, from market leading line matrix printers and RFID printers to high-performance thermal barcode label printers.

## Structured Cabling

Networking large data centres, retail, supply chain or office environments requires careful forethought, meticulous planning and expert knowledge. Jade specialise in the design, planning and management of structured cabling solutions that work around the needs of our clients in sometimes complex environments.

## Technical Services

Jades Technical Services Division has for many years been key to the company's success - removing the pain associated with large-scale deployment and making complex integration seamless. Our specialist team work to test software, device operating system compatibility, and network connectivity. We simplify technical integration and realise business goals. Our qualified engineers and project managers can also help train you and your staff allowing you to manage installations and integration in house.

**Jade works with a range of blue-chip organisations across multiple markets including:**
